8'/10' DISPLAYS

Looking for a sharp, simple, portable fabric backwall that sets up in 5 minutes? Look no further. The X Frame Tension Backwall 8ft by 10ft fabric back drop is one of the easiest and most portable solutions you can find. In addition to the standard landscape/horizontal configuration, X Frame Tension Backwall can be turned on its side to create a portrait/vertical wall as well.

The sturdy, lightweight 30mm aluminum frame assembles with push-button functionality. Simply stretch the graphic over the corners of the frame and you're done. You have an instant, impressive fabric backwall!

NAVE SERIES DISPLAY TENSION FABRIC GRAPHIC DISPLAY

p.31

WAVE SERIES DISPLAY

This is one of the best innovations in curved display walls in the last ten years. Even if we do say so ourselves! Once you've started using the Wave Series Display you'll wonder how you ever did without it.

Remember the old days when your only option was a pop-up display with the big heavy case on wheels? Times have well and truly changed. The Wave Series Display is a curved display wall that is cheaper, lighter, easier to use, and looks fabulous.

POP UP TENT BAG

A. Printing Width 2.55m **C. Two Pcs DX5 Print Heads** E. 1440 dpi high reliability

B. Eco-solvent Based Printer D. CMYK 4 Color Inks

Large Format Printing, typically defined as any final image size larger than 2300MM width allows you to digitally print large photos and logo illustrations as event banners or trade show panels directly from a computer disk or CD without the intermediate steps of traditional offset printing.

Sometimes referred to as wide format printing, your audience will notice the brilliant colors and high-resolution formats that are now available with this printing technology. Wide format prints are used in dozens of advertising and tradeshow applications including:

We print on a variety of substrate materials. Our digital prints are produced on photo paper, fabrics, canvas, vinyl, outdoor mesh, wallpaper, or film substrate materials. We print up to 1440 dpi final output using solvent based inks and using a two step dye sublimation print process. Finishing options include gromments, velcro webbing and pipe and drape clips.

Our MIMAKI dye sub print process can produce fabric output up to 93" in a seamless format on polyester fabrics. For widths up to 60" we produce full color images on six fabrics from satin to poly duck for our banner display fabric products.

We look forward in assisting you in any manner with your next large format print project or idea. If you have a need for high unit counts, please email us for a free sample. Have your design staff furnish a layout and FTP forward to our site. Else, please mail your artwork CD to us.

Specification:

Drum Size : 2500mm drum working width: 2400mm Temperature Range : 0 - 220° Celsius Pressure Range : 0 - 6 Bar (max) Overall Dimensions : 3100 x 1000 x 1650 Nett Weight : 500kg Packed Weight : 600kg Power 12kw / 3 phase

- * This rotary calander press is designed specifically to work alongside the digital sublimation sector whilst retaining all the qualities of a traditional large format rotary heatpress, but with reduced power consumption and overall dimensions.
- Maximum production speeds of 8 meters per minute
- Fully controllable entry and exit rollers
- Patented oil filled drum system
- Optional top bonding pressure cylinder
- * 2500mm drum and 2400mm working width
- High Quality Nomex Felt for long life Programmable startup and shutdown

Printer: ULTRA9000 Print Width reach 2.55m, no splicing for the large graphic, with amazing impact.

For the large graphic print by simple printer, it has to be spliced by two papers, so there is unavoidable with an obvious connecting line/ misalignment on the graphic.

15	Wrap film	3 Days

DIGITAL PRINTING COLOR INFORMATION MATERIAL **OFFSET VS DIGITAL**

Digital printing offers shorter turnaround and more consistent end result than offset printing. Digital printers do not print PMS and RGB colors. these colors will have color shitfs.

OFFSET VS DIGITAL

Although digital printers do not print PMS colors, our production team will manually adjust the color output to match your spot colors upon request. Please ask us about color matching service when you upload your files.*

REPRINTING

If you are in need of graphics from your previous orders printed by us, let us know before you approve proofs. To match colors with previously printed banners, we need extra time and information from you. We typically hold files for 1 year. By request, we can back up files for future use.

Printed colors look slightly different depending on materials. Refer to the material descriptions for more information.

OUTDOOR USE

Our outdoor banners are printed with UV-safe inks to prolong the life of your banner. They are hemmed around the edges for long life and can be grommeted for easy display outside your building or event.

NPRINTING SERVICES.

FINISHING OPTIONS

GROMMETS

Banner edges are hemmed with #2 grommets in corners. Available grommet colors: brass, silver, and black.

POLE POCKET The top and bottom of the banner is folded over and sewn creating a pocket that

accept dowels.

HOOK & LOOP Banners attach via hook & loop strips on top and bottom.

MATERIALS

We can digitally print banners on PVC, photo paper, scrim vinyl, etc. . . .

Laminated Photo paper 🔻 PVC 🔶

> Item No.: PM-1 Material: Photo Paper+PVC+Laminated Used For: Pop Up Display
